

Essential Skills in Forestry

Step into the Future of Forestry in Ontario

An immersive, hands-on program that provides a comprehensive overview of the essential skills needed to open doors to exciting careers in the forestry sector.

Explore:

- › The richness of Ontario's forest ecosystems
- › Indigenous knowledge and perspectives in forest management
- › The latest technologies in the forestry sector

Through a unique mix of cultural learning, workplace-integrated experiences, and use of current technologies, you'll gain the foundational skills for a rewarding career in sustainable forestry while supporting the communities that depend on it.

Work-Integrated Placement

This program includes a paid work placement in the forestry industry.

Who Can Apply?

We welcome individuals from all backgrounds who are eager to explore and learn about forestry. We especially encourage individuals from groups historically underrepresented in forestry careers—including women, youth, Indigenous peoples, racialized persons, persons with disabilities, and newcomers to Canada.

Limited Spots Available!

Course offered in English and in French.

Duration: 11 weeks

Start Date:

Monday, October 27, 2025

Cost: Free
